Re: WYCS(FM), Yorktown, Virginia  
Facility Identification Number: 66672  
Creative Educational Media Corporation, Inc.  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed May 1, 2008, on behalf of Creative Educational Media Corporation, Inc. ("CEMC"). CEMC requests further extension of the special temporary authority ("STA") granted on March 9, 2005, to operate Station WYCS with auxiliary facilities.<sup>1</sup> In support of the request, CEMC states that its application for site change was granted; however, it was unable to obtain all necessary local zoning approvals and it has filed an application for another site.<sup>2</sup>

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that Application BMPED-20070907ACI was dismissed as unacceptable for filing on October 10, 2008. Thus, no progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem. Extension of STA is warranted in order to provide for

---

<sup>1</sup> WYCS is licensed for operation on Channel 218B1 (91.5 MHz) with effective radiated power of 1.3 kilowatts (H), 20 kilowatts (V) and antenna heights above average terrain of 113 meters (H) and 101 meters (V).

<sup>2</sup> We note that Application BMPED-20070907ACI is pending.

continued operation of Station WYCS during its search for a new, permanent site.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WYCS may continue to operate with the following facilities (as authorized in BXLED-20050303AAQ):

Geographic coordinates:	37° 04' 41" N, 76° 26' 47" W (NAD 1927)
Channel	218 (91.5 MHz)
Effective radiated power:	4 kilowatts (V only)
Antenna height:	
above ground:	78 meters
above mean sea level:	87 meters
Above average terrain:	87 meters

CEMC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. It is anticipated that CEMC will continue to search diligently for a new, permanent transmitter site, and that an application for construction permit in compliance with the Commission's technical rules will be filed prior to the expiration date below.

This authority expires on **June 23, 2009**.

Sincerely,

Charles N. Miller, Engineer
